Office Action Summary

Claims in the application are 1-37.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-28 and 34-37, drawn to tissue containing linkers and
5 bridge molecule, or bridge molecules alone and methods of
crosslinking tissue, classified in class 435, subclass 1.1.

II. Claims 29-33, drawn to a method of bonding two molecules and a
composition containing linkers and bridge molecules, classified
in class 435, subclass 174.

10 The inventions are distinct, each from the other because:

The method and composition of II can have uses other than to
crosslink tissue as required by I such as to prepare immobilized
microorganisms. The tissue can be produced without using the composition
such as by adding the linkers and bridge molecules separately to tissue
15 without making the composition.

Because these inventions are distinct for the reasons given above
and have acquired a separate status in the art as shown by their
different classification, restriction for examination purposes as
indicated is proper.

20 Applicant is advised that the reply to this requirement to be
complete must include an election of the invention to be examined even
though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a
non-elected invention, the inventorship must be amended in compliance
25 with 37 CFR 1.48(b) if one or more of the currently named inventors is no

longer an inventor of at least one claim remaining in the application.
Any amendment of inventorship must be accompanied by a request under 37
CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications
5 from the examiner should be directed to David M. Naff whose telephone
